Preservative Procurement Readiness Checklist

14 documentation and verification items your preservative supplier must satisfy before a 100 kg+ production order. Compiled from Onerchemical supplier-onboarding SOP, 2024-2026 (60+ suppliers vetted).

6 Documentation (6 items)

- [ ] 01 CoA with batch-level numeric values on Assay, pH, Key impurity, Heavy metals, Residual solvents (not just pass/fail)
- [ ] 02 SDS in current GHS format (verify revision date within 24 months)
- [ ] 03 TDS with pH, solubility, melting point, and recommended use-level range
- [ ] 04 GMP / ISO 22716 certificate from third-party auditor (SGS, Intertek, Bureau Veritas)
- [ ] 05 REACH pre-registration confirmation (EU shipments) OR equivalent per target market
- [ ] 06 Certificate of Origin + commercial invoice with correct HS code

4 Quality control (4 items)

- [ ] 07 Retained sample policy — supplier keeps 500 g per batch for 24 months minimum
- [ ] 08 Change-notification SOP in writing — 60 days before any process, source, or spec change
- [ ] 09 Third-party retest allowance — buyer may send any batch for independent analysis without penalty
- [ ] 10 Batch-size and date triplet on CoA (batch number + manufacture date + batch size)

4 Commercial (4 items)

- [ ] 11 MOQ clearly tiered (e.g. 100 kg / 500 kg / 1 ton) with per-kg pricing at each tier
- [ ] 12 Payment terms acceptable (30/70 T/T or L/C — avoid 100% advance)
- [ ] 13 Lead time stated in writing (production + QC + shipping, not just production)
- [ ] 14 Incoterm named (FOB/CIF/DDP) with correct named port — not just "China port"
